TESTING MATRIX

APPENDIX D: CAA WORKSHEET

Introduction

It shall be the policy of the Desert/Mountain Charter Special Education Local Plan Area (SELPA) that all children with disabilities shall participate in state and districtwide assessment programs. The Individualized Education Program (IEP) team determines how a child with a disability will access assessments with or without supports, or access alternate assessments, consistent with state standards governing such determinations.

The Charter Local Education Agency (LEA) shall administer mandatory student assessments as required by law and in accordance with Charter SELPA policy and administrative regulations.

The Charter LEAs within the Charter SELPA are committed to all children having access to state and/or Charter LEA assessments. Through the IEP process each child's strengths and weaknesses will be evaluated to determine areas of educational need.

Each Charter LEA will follow and implement the California State Board of Education (SBE) policies and administrative regulations related to assessment, data collection, and waiver processes.

The Charter SELPA forms include an assessment plan (D/M 66) as well as statements related to statewide assessment.

Children with disabilities shall be tested with the designated state assessments unless their IEP specifically identifies that the child will be tested with an alternate assessment. The IEP team will determine which assessment will be most appropriate for each child based on guidance provided by the California Department of Education (CDE).

A child shall be permitted to take assessments with the supports as identified in his/her IEP or Section 504 plan. These supports must be in compliance with the current "Testing Variations, Accommodations, and Modifications Matrix" provided by the CDE.

School personnel have a responsibility to ensure that children with disabilities have appropriate accommodations and/or modifications to meet their individual needs, and allow access to all state and Charter LEA assessments.

Section A – Profile of State Assessment Programs

Testing Accommodations

California Education Code § 56345(a). The individualized education program is a written statement for each individual with exceptional needs that is developed, reviewed, and revised in accordance with this section, as required by Section 1414(d) of Title 20 of the United States Code, and that includes the following:...(6)(A) A statement of individual appropriate accommodations that are necessary to measure the academic achievement and functional performance of the pupil on state and districtwide assessments consistent with Section 1412(a)(16)(A) of Title 20 of the United States Code. (B) If the individualized education program team determines that the pupil shall take an alternate assessment instead of a particular state or districtwide assessment of pupil achievement, a statement of the following: (i) The reason why the pupil cannot participate in the regular assessment; (ii) The reason why the particular alternate assessment selected in appropriate for the pupil.

Academically Rigorous Content Standards

California Education Code § 60850(a). The Superintendent of Public Instruction, with the approval of the State Board of Education, shall develop a high school exit examination in English language arts and mathematics in accordance with the statewide academically rigorous content standards adopted by the State Board of Education pursuant to Section 60605. To facilitate the development of the examination, the superintendent shall review any existing high school subject

matter examinations that are linked to, or can be aligned with, the statewide academically rigorous content standards for English language arts and mathematics adopted by the State Board of Education. By October 1, 2000, the State Board of Education shall adopt a high school exit examination that is aligned with statewide academically rigorous content standards.

California Assessment of Student Performance and Progress (CAASPP)

Education Code § 60640 established the California Assessment of Student Performance and Progress (CAASPP). The CAASPP System, which replaced the Standardized Testing and Report (STAR) Program, is the new state academic testing program. It is a system intended to provide information that can be used to monitor student progress and ensure that all children leave high school ready for college and career. The CAASPP encompasses the following assessments and student participation requirements:

- Smarter Balanced Summative Assessments for English language arts/literacy (ELA) and mathematics in grades three through eight and 11;
- Alternate Assessments for English language arts/literacy and mathematics in grades three through eight and 11; and
- Standards-based Tests in Spanish (STS) for reading/language arts in grades two through 11 (optional).

English Language Proficiency Assessments for California (ELPAC)

In 2018, the CDE replaced the California English Language Development Test (CELDT), which is aligned with the 1999 English Language Development (ELD) Standards, with the English Language Proficiency Assessments for California (ELPAC), which are aligned with the 2012 California ELD Standards.

Federal Requirements – IDEA

As appropriate, the state or LEA - (i) develops guidelines for the participation of children with disabilities in alternate assessments for those children who cannot participate in state and districtwide assessment programs; and (ii) develops and, beginning not later than July 1, 2000, conducts those alternate assessments.

Federal Requirements - Title 1 of the Elementary and Secondary Education Act indicates: Guidance from the Assistant Secretary for Elementary and Secondary Education (April 2000)

For children with disabilities whose IEP or Section 504 placement teams have determined that the state assessments would not appropriately show what a child knows or is able to do, each state must have a statewide alternate assessment system or a comprehensive state policy governing locally developed alternate assessments. Alternate assessments must be valid, reliable, and to the maximum extent appropriate, aligned to state content and performance standards. In addition, states must monitor and collect data from Charter LEAs to ensure the proper use of alternate assessments. Charter LEAs must publicly report the results of alternate assessments; they must integrate the results of alternate assessments into their accountability systems.

Physical Fitness Test (PFT) Administered at Grade Levels

The SBE designated the FITNESSGRAM® as the Physical Fitness Test (PFT) for children attending California public schools. The FITNESSGRAM® is a comprehensive, health-related physical fitness battery developed by The Cooper Institute. The primary goal of the FITNESSGRAM® is to assist children in establishing lifetime habits of regular physical activity.

Pursuant to Education Code § 60800, all LEAs in California are required to administer the PFT annually to all children in grades five, seven, and nine. Children in grades five, seven, and nine are required to take the PFT, whether or not they are enrolled in a physical education class or participate in a block schedule. These include children who are enrolled in LEAs such as elementary, high, and unified school districts, county offices of education, and charter schools. Charter LEAs must also test all children in alternate programs, including, but not limited to, continuation schools, independent study, community day schools, county community schools, and nonpublic schools. Children who are physically unable to take the entire test battery are to be given as much of the test as his or her condition will permit (Education Code § 60800; Title 5 of the California Code of Regulations § 1041).

The PFT provides information that can be used by 1) students to assess and plan personal fitness programs, 2) teachers to design the curriculum for physical education programs, and 3) parents to understand their child's fitness levels. This program also provides results that are used to monitor changes in the physical fitness of California students.

Section B - Guidance for Making Support(s) Decisions

Statewide assessments have the following purpose: 1) to show how much a child has learned, 2) to reveal how successfully a school has educated its children, and 3) to help guide instructional improvement strategies. Since instructional and policy decisions are based on data from standards-based assessments, children with disabilities need to be included to the maximum extent possible. The following guidance offers information about the major assessment programs in California and specific information on how to provide test accommodations when needed.

Section C – Guide to the Accommodations Matrix: California Assessment of Student Performance and Progress (CAASPP)

Signed into law on October 2, 2013, Assembly Bill 484 establishes the CAASPP System. The provisions of AB 484 became effective January 1, 2014. The CAASPP System is based on the state's new Common Core Standards for English language arts (ELA) and mathematics adopted by the SBE in 2010. The CAASPP System replaces the Standardized Testing and Reporting (STAR) Program. The primary purpose of the CAASPP system is to assist teachers, administrators, and children and their parents by promoting high quality teaching and learning through the use of a variety of assessment approaches and item responses.

A. Types of Support

- (1) **Embedded Supports** are digitally-delivered features or settings available as part of the technology platform for the computer-administered CAASPP tests. These supports do not change or alter the construct being measured;
- (2) **Non-embedded Supports** are available, when provided by the Charter LEA for either computer-administered or paper-pencil CAASPP tests. These supports are not part of the technology platform for the computer-administered CAASPP tests. These supports do not change or alter the construct being measured.

B. Who is Eligible

- (1) **Universal Tools** are available to all children. Children may turn the support(s) on/off when embedded as part of the technology platform for the computer-administered CAASPP tests or may choose to use it/them when provided as part of a paper-pencil test;
- (2) **Designated Supports** are features that are available for use by any child for whom the need has been indicated prior to the assessment, by an educator or group of educators;
- (3) **Accommodations** are available for eligible children if specified in their IEP or Section 504 plan; and
- (4) **Unlisted Resources:** If an IEP team or Section 504 plan identifies and designates a resource not identified in the CAASPP matrix, the Charter LEA CAASPP Coordinator or the CAASPP Test Site Coordinator may submit, on behalf of a child who has an IEP or Section 504 plan, a request through the Test Operations Management System (TOMS) to the CDE, prior to the administration of a CASPP achievement test, to allow the use and approval of an Unlisted Resource. The Charter LEA CAASPP Coordinator or the CAASPP Test Site Coordinator shall make the request on behalf of the Charter LEA 10 business days prior to the child's first day of CAASPP testing. The CDE shall respond to the request within four business days from the date of the electronic transmission.

Unlisted Resources are not Universal Tools, Designated Supports, or Accommodations. Unlisted Resources means an instructional support that a child regularly uses in daily instruction and/or assessment that has not been previously identified as a universal tool, designated support, or accommodation. Because an Unlisted Resource has not been identified as a universal tool, designated support, or accommodation, it may or may not change the construction of the assessment.

The use of an Unlisted Resource by a child will not be allowed if the CDE determines its use threatens the security of the test. In addition to determining whether the Unlisted Resource may be used, the CDE will determine whether the Unlisted Resource changes the construct being measured by the CAASPP achievement test. If the CDE determines the Unlisted Resource changes the

construct being measured, the Unlisted Resource will not be approved but may still be used by the child and the child will receive an individual score report. The child will not be counted as participating in statewide testing, which will impact the accountability participation rate indicator for the Charter LEA. If the CDE determines the Unlisted Resource does not change the construct being measured, the Unlisted Resource will be approved and the child will receive an individual score report and will be counted as participating in statewide testing. Refer to Title 5 of the California Code of Regulations § 853.8 for a list of non-embedded Unlisted Resources that have already been determined to change the construct being measured on the CAASPP achievement tests for English language arts (including the components for reading, writing, and listening), mathematics, science, and primary language and will not be approved. The use of an Unlisted Resource must be requested annually by the Charter LEA.

IEP teams should be made aware of the impact of the use of Unlisted Resources pursuant to Title 5 of the California Code of Regulations, but should not allow the impact of the LEA's accountability to outweigh the needs of the child.

Title 5 of the California Code of Regulations § 853.8(d)(1). If the CDE determines the unlisted resource changes the construct being measured, the unlisted resource will not be approved but may still be used by the pupil and the pupil will receive an individual score report. The pupil will not be counted as participating in statewide testing, which will impact the accountability participation rate indicator for the LEA.

Section D – Overview of the Alternate Assessment

The Individuals with Disabilities Education Act (IDEA) 2004 and similar amendments to California law require the inclusion of children with disabilities in general state and districtwide assessment programs with appropriate supports, where necessary. An alternate assessment is required for children with severe disabilities who cannot participate in general larger-scale assessment programs. The law states:

"As appropriate, the State or local educational agency - (i) develops guidelines for the participation of children with disabilities in alternate assessments for those children who cannot participate in State and district wide assessment programs; and (ii) develops and, beginning no later than July 1, 2000, conducts those alternate assessments."

(d) "Alternate assessments" means any assessments as provided in Education Code section 60640(k) and the test materials developed to measure the level of performance for a pupil with significant cognitive disabilities who is unable to take the consortium summative assessments in English language arts (ELA) and mathematics pursuant to Education Code section 60640(b)(1) or is unable to take an assessment of science pursuant to Education Code section 60640(b)(2), even with resources.

California Alternate Assessments (CAA)

Pursuant to Title 5 of the California Code of Regulations § 850(h), California Alternate Assessments (CAAs) are the alternate assessments and corresponding test materials in ELA and mathematics as provided for in Education Code § 60640(k) for children with significant cognitive disabilities. The CAA is the success alternate assessment for ELA and mathematics as identified in Education Code § 60640(b)(3).

Children in grades three through eight and grade 11 who have an IEP that designates the use of an alternate assessment are eligible to take the CAA in lieu of the Smarter Balanced Summative Assessments for ELA and mathematics. The goal of the CAA is to ensure that children with significant cognitive disabilities attain increasingly higher achievement levels and leave high school ready for academic or career options.

Section E – Guide to the Accommodations Matrix: Physical Fitness Test (PFT)

Charter SELPA form D/M 68F (Appendix B) was designed to help IEP and Section 504 teams make informed decisions about supports on the Physical Fitness Test.

Who is eligible for accommodations?

Those accommodations designated as Category 1, may be described as flexibility in administration of the test and do not alter what is measured by the test. These accommodations are available for any child who uses the accommodation regularly for classroom instruction and/or assessment. Accommodations are not only for the child receiving special education or Section 504 services, but these children are the only ones for whom the law requires accommodations be provided. Even though Category 1 accommodations are available for all children, they should be documented in the IEP or Section 504 plan for those children with disabilities who need the accommodation to access the test and minimize the effects of their disability.

Accommodations designated as Category 2 are allowed only for children who have them documented in their IEP or Section 504 plan and are similar to those used by the child for classroom instruction and/or classroom assessment. In general, Category 2 accommodations require a more significant alteration in presentation, timing/scheduling, setting, or response and, in most cases, require more preplanning in order to ensure the availability of needed resources.

Modifications designated as <u>Category 3</u>, fundamentally alter what the test measures. They are available only to children with documentation on their IEP or Section 504 plan. Children who use a modification on any assessment are not included in the participation calculation for Annual Yearly Progress (AYP).

Section F – Guide to the Accommodations Matrix for the English Language Proficiency Assessments for California (ELPAC)

This matrix is used in conjunction with Title 5 of the California Code of Regulations § 11517.6 through 11519.5 of the English Language Proficiency Assessments for California (ELPAC), to determine the use of resources for individual students. The appropriate use of universal tools, designated supports, and/or accommodations on the ELPAC test is restricted to only those identified on the matrix.

- <u>Universal tools</u> are those available to **all** students on the basis of student preference and selection.
- <u>Designated supports</u> are available to **all** students when determined for use by an educator or team of educators (with parent/guardian and student input, as appropriate) or specified in the student's IEP or 504 Plan.
- <u>Accommodations</u> must be permitted on ELPAC tests to **all** eligible students if specified in the student's IEP or 504 Plan.

<u>Embedded resources</u> are digitally delivered universal tools (U), designated supports (D), or accommodations (A) available as part of the technology platform for the computer administered tests. Since ELPAC is a paper-pencil assessment, embedded resources do not apply at this time.

<u>Non-embedded resources</u> are universal tools (U), designated supports (D), or accommodations (A) when provided by the LEA for the ELPAC tests administered via paper-pencil. These supports are not part of the technology platform for computer-administered tests, and do not change or alter the construct being measured.

Instructional Supports and Resources on Alternative Assessments

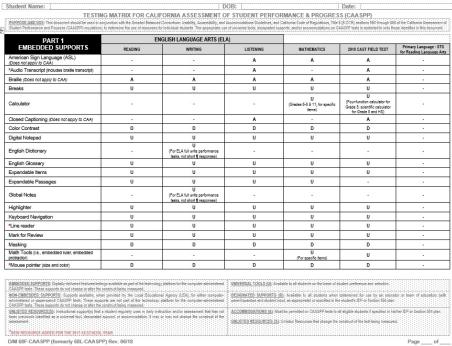

Most students taking the ELPAC will be able to access the assessment with the universal tools, designated supports, and accommodations. If a student is unable to access the ELPAC with supports, an alternative assessment will be decided upon by the IEP Team for the domains for which an alternative assessment should be used.

Unlisted Resources

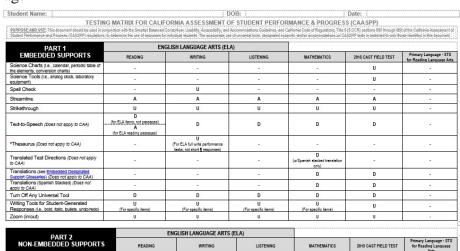

Unlisted resources are not universal tools, designated supports, or accommodations. Unlisted resources shall be made available if specified in the eligible student's IEP or Section 504 Plan and only on approval by CDE. Unlisted resources may be submitted to CDE prior to ten business days before the student's first day of testing. CDE will reply to the request within four business days.

DOB:

INSTRUCTIONAL SUPPORTS AND RESOURCES ON ALTERNATE ASSESSMENT(S)

Most students taking the ELPAC will be able to access the assessment with the universal tools, designated supports, and accommodations. If a student is unable to access the ELPAC with the supports listed, an alternate assessment will be decided upon by the IEP team for the domain(s) for which an alternate assessment should be used.

UNLISTED RESOURCES

Unlisted Resources are not universal tools, designated supports, or accommodations. Unlisted Resources shall be made available if specified in the eligible student's IEP or Section 504 plan, and only on approval by the CDE.

EMBEDDED SUPPORTS: Digitally delivered universal tools (i/), designated supports (0), or accommodations (A) available as part of the technology platform for the computer-administered assessments. Embedded resources do not change or after the construct being measured. The ELPAC is a paper-period assessment and embedded resources do not apply to the ELPAC at this technology.

ANN_EMBEDDED SUPPORTS: These are universal tools (U), designated supports (D), or accommodations (A) available, when provided by the local education agency (LEA) for the ELPAC paper-pencil assessments. These supports are not part of the schnology platform for computer-administered assessments and do not change or alter the construct being measured.

NN_ISTED RESOURCE(S): These resources are not universal tools (U), designated supports (D), or accommodations (A). Unlisted Resources are made available if specified in the eligible solderfs IEP or 504 plan, and only on approval by the California Department of Education (CDE).

APPENDIX C: Form D/M 68F – ELPAC Matrix

Page 3

Student Name: DOB: TESTING MATRIX (CAASPP) – ENGLISH LANGUAGE PROFICIENCY ASSESSMENTS FOR CALIFORNIA (ELPAC) PURPOSE AND USE. This document should be used in conjunction with the California Code of Regulations, Title 5 (CCR), sections 11517 6 through 11515 of the English Language Proficiency Assessments for California (ELPAC) regulations, to determine the use of resources for individual students. The appropriate use of universal tools, designated supports, and/or accommodations on the ELPAC assessments for individual students. This matrix displays the universal tools, designated supports, and/or accommodations (non-embedded) allowed as part of the ELPAC assessments beginning October 1, 2017.

To request the use of an Unisted Resource, the LEA ELPAC Coordinator or Site ELPAC Coordinator may submit a request to the CDE a minimum of 10 business days before the student's first day of testing. The CDE will reply to the request within four business days.

Approval of an Unisted Resource that has not previously identified will be granted by the CDE on the basis of the IEP team's and/or Section 504 plan's designation and if the Unisted Resource does not compromise the test's security. The CDE shall make a determination of whether the requested Unisted Resource changes the construct being measured after the testing has been completed.

IDENTIFIED UNLISTED RESOURCES

The CDE has identified non-embedded unlisted resources for the ELPAC that change the construct being assessed. The LEA may contact the ELPAC program office at elpac@cde.ca.gov, or at 916-319-0784 to request the use of the identified and other unlisted resources required by a student's IEP or Section 504 plan. In the request include: LEA name and school name; LEA ELPAC coordinator name, phone number, and e-mail address; and a description of the unlisted resource being requested for an ELPAC domain(s).

IDENTIFIED NON-EMBEDDED UNLISTED RESOURCES THAT CHANGE	DOMAINS			
THE CONSTRUCT BEING MEASURED	Listening	Speaking	Reading	Writing
American Sign Language (ASL)	Х	Х	Х	
Bilingual Dictionary	Х	Х	Х	Х
English Dictionary	Х	Х	Х	Х
Signed Exact English	Х	Х	Х	Х
Thesaurus	Х	Х	Х	Х
Translations	х	х	х	х
Translated Word Lists	Х	Х	х	Х

EMPEDDED SUPPORTS: Digitally delivered universal tools (U), designated supports (D), or accommodations (A) available as part of the technology platform for the computer-administered assessments. Embedded resources do not change or after the construct being measured. The ELPAC is a paper-pencil assessment and embedded resources do not apply to the ELPAC at this

Non-EMBEDDED SUPPORTS: These are universal tools (U), designated supports (D), or accommodations (A) available, when provided by the focal education agency (LEA) for the EEPAC pages spend assessments. These supports are not part of the technology palation for computer administered assessments and do not change or after the construct being measured.

UNLISTED RESOURCE(S): These resources are not universal tools (U), designated supports (D), or accommodations (A). Unlisted Resources are made available if specified in the eligible subtents (EPP or 634 bits), and only on approval by the California Description (DEI).

APPENDIX D: California Alternate Assessment (CAA) Factsheet

CAA Guidance for IEP Teams

California Alternate Assessments for English Language Arts, Mathematics, and Science: Participation Decisions

This document is intended to help guide individualized education program (IEP) teams in determining whether the California Alternate Assessments (CAAs)—alternate assessments based on alternate achievement standards—are the most appropriate assessments for an individual student. The CAAs were developed by the California Department of Education to ensure that all students are able to participate in assessments that are a measure of what they know and can do in relation to the grade-level California Common Core State Standards (CCSS) and the California Next Generation Science Standards (CA NGSS). In addition, the CAAs were developed to be part of a system of curriculum, instructional, and assessment tools such that students with significant cognitive disabilities would be able to participate in content instruction and assessments that are aligned with the CA CCSS. This is accomplished by a linkage between the CA CCSS and Core Content Connectors (CCCs), which are in turn aligned with the CCC and CAA items.

IEP teams must consider a student's individual characteristics when determining whether a student with a disability should participate in the general assessments, with or without accommodations, or in the alternate assessments. This document outlines steps that an IEP team is to take in determining whether the CAAs are appropriate for a student, including reviewing student records and important information across multiple school years and settings (e.g., school, home, community) and determining whether the student fits all of the criteria for participating in the CAAs as outlined in this document. Additionally, as part of the IEP process, parents must be clearly informed that their child's achievement is being measured against alternate achievement standards, and of "how participation in such assessments may delay or otherwise affect the student from completing the requirements for a regular high school diploma." While many of the students taking the CAAs are not on a "diploma track," this "does not preclude a student with the most significant cognitive disabilities who takes an alternate assessment from attempting to complete the requirements for a regular high school diploma."

Description of the CAAs

English Language Arts and Mathematics

The CAAs are assessments for English language arts (reading and writing) and mathematics in grades three through eight and grade eleven. They are on-demand assessments of approximately 29 test items that assess approximately 10 to 12 prioritized content targets per grade level, depending on the grade level. These content targets were identified for each grade on the basis of learning progressions and alignment with the grade-level CCSS. These assessments include

multiple-choice, constructed-response, and technology enhanced items. Each content target is assessed by items that have been carefully and intentionally designed to assess a range of ability and performance.

Science

The new CAA for Science test was first piloted in the 2016–17 school year, and is completing a second pilot year in 2017–18. All students enrolled in grades five and eight will be administered the pilot test. All grade twelve students are to take the pilot test; if the student is in grades ten or eleven has finished their last science class, and the LEA elects to administer the assessment at those grade levels, those students may also be assessed. Regardless of the grade level in which the test is taken, students will only take the test once in high school. This new assessment is aligned with the CA NGSS. The Next Generation Science Standards were developed by the States in conjunction with the National Research Council (NRC), the National Science Teachers Association (NSTA), the American Association for the Advancement of Science (AAAS), and other critical partners. The CAA for Science represents a new format of assessment for students with the most significant cognitive disabilities. Included with the assessment is a science lesson, which the teacher can deliver when it best fits their instructional calendar. After the lesson is taught, the teacher then conducts the actual assessment, and collects data on individual student performance.

Assessment Administration

English Language Arts and Mathematics

The CAAs for English language arts and mathematics are delivered via computer, with allowances for flexibility in administration (e.g., a student may respond to administrator-presented item stimuli rather than to the item stimuli on the computer). A trained testing examiner familiar with the student (e.g., the student's teacher) facilitates the administration in a 1:1 setting, presenting items via computer, paper, or manipulatives, as appropriate for the student. Items are administered to the student over the course of one or more testing sessions, as needed for the student to complete a content-area assessment.

The CAAs use a staged approach, meaning that each student receives items that have been determined to be an appropriate level of challenge. Embedded routing tests help determine the items a student encounters.

Science

The CAA for Science is also administered in a 1:1 setting, although the embedded lesson can be taught in a group setting. After the student has participated in instruction of the standard, the teacher then delivers the assessment and collects data on the student's performance. Overall, there is flexibility built in to the process, allowing the teacher to utilize materials that the student is most comfortable with, and to adjust the administration script to provide the student with a higher level of access, while not changing the standard being measured. After the CAA for Science has

completed its pilot phase, this test will also move to the computerized platform for field and operational testing.

Participation Criteria

IEP teams should use the CAA Participation Decision Worksheet to determine whether a student is eligible to participate in the CAAs. The CAAs for ELA, and math are administered each year to students in grades three through eight and grade eleven whose IEPs determine participation in the alternate assessments, and who meet the required criteria. The CAA for Science is administered in grades five, eight, and once in high school. As reflected in the CAA guidelines, to participate in the CAAs, a student must meet all three of the following criteria:

- 1. A student with a significant cognitive disability. Review of the student's school records indicates a disability or multiple disabilities that significantly impact intellectual functioning and adaptive behavior essential for someone to live independently and to function safely in daily life.
- 2. The student is learning content derived from the CA CCSS and CA NGSS. Goals and instruction listed in the IEP for the student are linked to the enrolled grade-level CCSS and address knowledge and skills that are appropriate and challenging for this student.
- 3. The student's need for extensive, direct individualized instruction and substantial supports to achieve measurable gains in the grade-level and age-appropriate curriculum. The student:
 - a. Requires extensive, repeated, individualized instruction and support that is not of a temporary or transient nature; and
 - b. Uses substantially adapted materials and individualized methods of accessing information in alternative ways to acquire, maintain, generalize, demonstrate, and transfer skills across multiple settings.

Participation Descriptions

- 1. A student with a significant cognitive disability is one whose school records indicate a disability or multiple disabilities that significantly impact intellectual functioning and adaptive behavior. Adaptive behavior is defined as actions essential for an individual to live independently and to function safely in daily life. Having a significant cognitive disability is not determined by an IQ test score; rather, a holistic understanding of the student is required. IEP teams should be careful to consider...
- Conceptual skills—language and literacy; money, time, and number concepts; and self-direction.

- Social skills—interpersonal skills, social responsibility, self-esteem, gullibility, naïveté (i.e., wariness), social problem solving, and the ability to follow rules/obey laws and to avoid being victimized.
- Practical skills—activities of daily living (personal care), occupational skills, healthcare, travel/transportation, schedules/routines, safety, use of money, use of the telephone.

As part of the IEP team decision, did the team also consider...

- community environment typical of the individual's peers and culture?
- linguistic diversity?
- cultural differences in the way people communicate, move, and behavior?
- 2. The student is learning content derived from the CCSS and/or the CA NGSS. The student's disability or multiple disabilities affect how the student learns curriculum derived from the CCSS or the CA NGSS. The student is learning content that is derived from the CA CCSS or CA NGSS that appropriately breaks the standards into smaller steps. The National Center and State Collaborative has derived these smaller steps from the CCSS to guide instruction, and they are called Core Content Connectors (CCCs). CCCs were also developed for the CA NGSS standards. A CCC is a representation of the essential "core" content of a given standard. Each CCC was identified by examining learning progressions aligned with the CCSS or CA NGSS to determine the critical content for students with significant cognitive disabilities.
- 3. The student's need for extensive, direct individualized instruction is not temporary or transient. His or her need for substantial supports to achieve gains in the grade-level and age-appropriate curriculum requires substantially adapted materials and customized methods of accessing information in alternative ways to acquire, maintain, generalize, demonstrate, and transfer skills across multiple settings.

The IEP team should consider the following information to determine whether the CAAs are appropriate for an individual student:

- Description of the student's curriculum and instruction, including data on progress
- Classroom work samples and data
- Examples of performance on assessment tasks to compare with classroom work
- Results of district-wide assessments
- Results of individualized reading assessments
- IEP information, including:

- Present levels of academic achievement and functional performance, goals, and short-term objectives
- Circumstances of a student with individualized and substantial communication needs or modes (from multiple data sources)
- Circumstances of a student who may be learning English as a second or other language (i.e., an English learner), which may interfere with an accurate assessment of his or her academic, social, or adaptive abilities

Some issues, such as those listed below, may affect a student's learning experience and his or her ability to learn that are not appropriate to consider during the decision-making process for the CAAs. Do not use the following as criteria for participation/eligibility decisions:

- 1. A disability category or label
- 2. Poor attendance or extended absences
- 3. Native language/social/cultural or economic difference
- 4. Expected poor performance on the general education assessment
- 5. Academic and other services student receives
- 6. Educational environment or instructional setting
- 7. Percent of time receiving special education
- 8. Student identification as an English learner (EL); as above, this is a consideration of how the student's English fluency may affect their performance as opposed to their disability
- 9. Low reading level/achievement level
- 10. Anticipated disruptive behavior
- 11. Impact of test scores on accountability system
- 12. Administrator decision
- 13. Anticipated emotional distress
- 14. Need for accommodations (e.g., assistive technology/augmentative and alternative communication) to participate in assessment

For information about the CAAs, contact the Science and Alternate Assessments Office at 916-445-8765 or by e-mail at: <u>CalALT@cde.ca.gov</u>.

NOTE: The following pages contain an image of the California Alternate Assessment Participation Worksheet template/format offered by the California Department of Education:

California Alternate Assessment Participation Decision Worksheet

To meet the criteria for the California Alternate Assessments, the student must meet all eligibility criteria descriptors.

Participation Criteria	Participation Criteria Descriptors	Sources of Evidence (check if used)
The student has a significant cognitive disability. YES NO	Review of student records indicates a disability or multiple disabilities that significantly impact intellectual functioning and adaptive behavior.* *Adaptive behavior is defined as essential for someone to live independently and to function safely in daily life.	Results of individual cognitive ability test Results of adaptive behavior skills assessment Results of individually and group-administered achievement tests Results of informal assessments Results of individual reading assessments Results of districtwide alternate assessments Results of language assessments, including English learner (EL) language assessments if applicable
2. The student is learning content linked to (derived from) the California Common Core State Standards (CA CCSS) or the California Next Generation Science Standards (CA NGSS).	Goals and instruction listed in the IEP for this student are linked to the enrolled grade-level CCSS and NGSS and address knowledge and skills that are appropriate and challenging for this student.	Examples of curriculum, instructional objectives, and materials' including work samples Present levels of academic and functional performance, goals, and objectives from the IEP Data from scientific research-based interventions Progress monitoring data
3. The student requires extensive direct individualized instruction and substantial supports to achieve measureable gains in the grade-and age-appropriate curriculum. YES NO	The student (a) requires extensive, repeated, individualized instruction and support that is not of a temporary or transient nature; and (b) uses substantially adapted materials and individualized methods of accessing information in alternative ways to acquire, maintain, generalize, demonstrate and transfer skills across academic content.	Examples of curriculum, instructional objectives, and materials, including work samples from both school and community-based instruction Teacher-collected data and checklists Present levels of academic and functional performance, goals, objectives, and post-school outcomes from the IEP and the transition plan for students age twelve and older.

Page 1 of 2

Page 2 of 2 – CAA Worksheet format – CDE, October 2017

If the IEP team has made the determination that the student is to participate in the CAAs, and <u>all responses</u> above are marked "YES", the student is eligible to participate in the California Alternate Assessments.

IEP Team Statement of Assurance: Our decision was based on multiple pieces of evidence that, when taken together, demonstrated that the Alternate Assessment is the most appropriate assessment for this student; that his/her academic instruction will be based on the CCCs linked to the CA CCSS or CA NGSS; that the "Considerations NOT to Use in Reviewing Evidence" were not used to make this decision; and that any additional implications of this decision were discussed thoroughly.

Each of us agrees with the IEP team decision to use the California Alternate Assessment:
